# JUSTIFICATION FOR SUSTAINABLE DEVELOPMENT GOAL

| TITLE  | PRIMARY                                                                                                                      | SECONDARY                                                                                                                          | TERITARY                                                                                          |
|--------|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| GOAL   | <b>SDG11</b> -Sustainable Cities and Communities.                                                                            | <b>SDG16</b> - Peace, Justice and Strong Institutions.                                                                             | <b>SDG8</b> – Decent Work and Economic Growth                                                     |
| TARGET | <p>11.5: Reducedeathsand injuries with faster emergency help.</p> <p>11.7: Make public spaces safer and more accessible.</p> | <p>16.6: Ensure trust with transparent and tamper-proof records.</p> <p>16.10: Provide verified info and secure communication.</p> | <p>8.5: Support jobs and growth in tourism.</p> <p>8.9: Promote safe and responsible tourism.</p> |

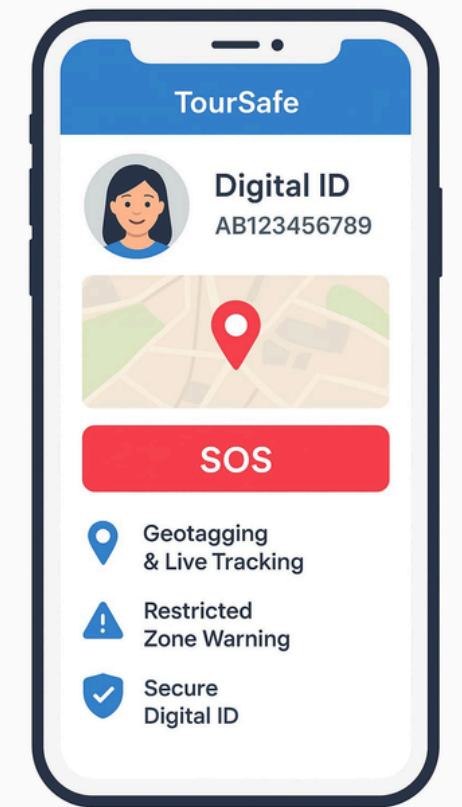

# Who we are

Name of your Venture: **TourSafe**

## Why ?

Explain why do you want to pursue this Business Idea.

**Tourists often face safety issues in remote areas due to lack of real-time monitoring, delayed emergency response, and identity verification problems. We aim to reduce risk, enhance trust, and make tourism safer, boosting tourism-driven economies.**

## What ?

Provide a brief on what does your venture do.

- **Blockchain-based Digital ID**
- **Geo-fencing alerts for restricted zones**
- **SOS emergency features**
- **AI anomaly dashboard for unusual behavior**
- **Authority dashboard for quick response**

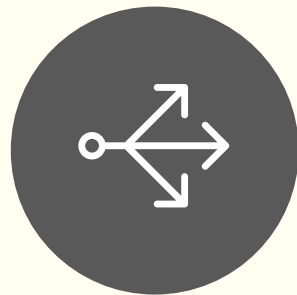

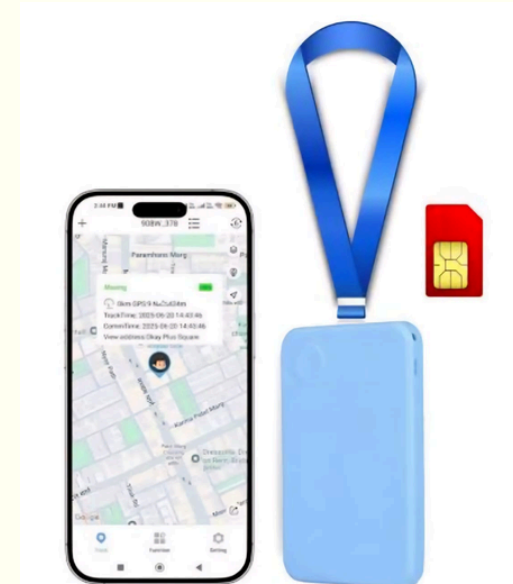

Your goal when answering this slide should be to create enough interest about your venture.

## How ?

Explain how your venture solves the problem and make its revenue.

- **Freemium model for basic safety features**
- **Subscription model for premium features (insurance integration, multilingual support)**
- **B2G partnerships with tourism departments and smart city projects.**

## CONTEXT

When does the problem occur?

Tourists face safety issues in remote or high-risk areas, especially in forests, mountains, or politically sensitive regions where network connectivity and traditional monitoring fail.

## PROBLEM

What is the root cause of the problem?

- No real-time tourist tracking
- Slow emergency response
- Difficulty in identity verification
- Restricted area violations
- Lack of predictive safety alerts

## ALTERNATIVES

What do customers do now to fix the problem?

- **Manual police check-post verification**
- **Guide-assisted trips**
- **SOS apps without real-time monitoring or authority linkage.**

## CUSTOMERS

Who has the problem most often?

- **Domestic and international tourists**
- **Tour operators**
- **Local tourism authorities and law enforcement agencies**

## EMOTIONAL IMPACT

How does the customer feel?

- Tourists feel unsafe, anxious, and hesitant to explore new places
- Families worry about loved ones traveling alone.

## QUANTIFIABLE IMPACT

What is the measurable impact (include units)?

- Tourism contributes ~10% to India's GDP, but safety concerns cause drop in tourist arrivals by up to 15% in high-risk regions.
- Response time in emergencies averages 30-40 mins, which TourSafe aims to reduce by 70%.

## ALTERNATIVE SHORTCOMINGS

What are the disadvantages of the alternatives?

- Manual systems are slow and error-prone.
- No predictive alerts
- Lack of identity security.

**1.How many customers did you interview?**

50 tourists and 10 tour operators

**2.What was the interview mode?**

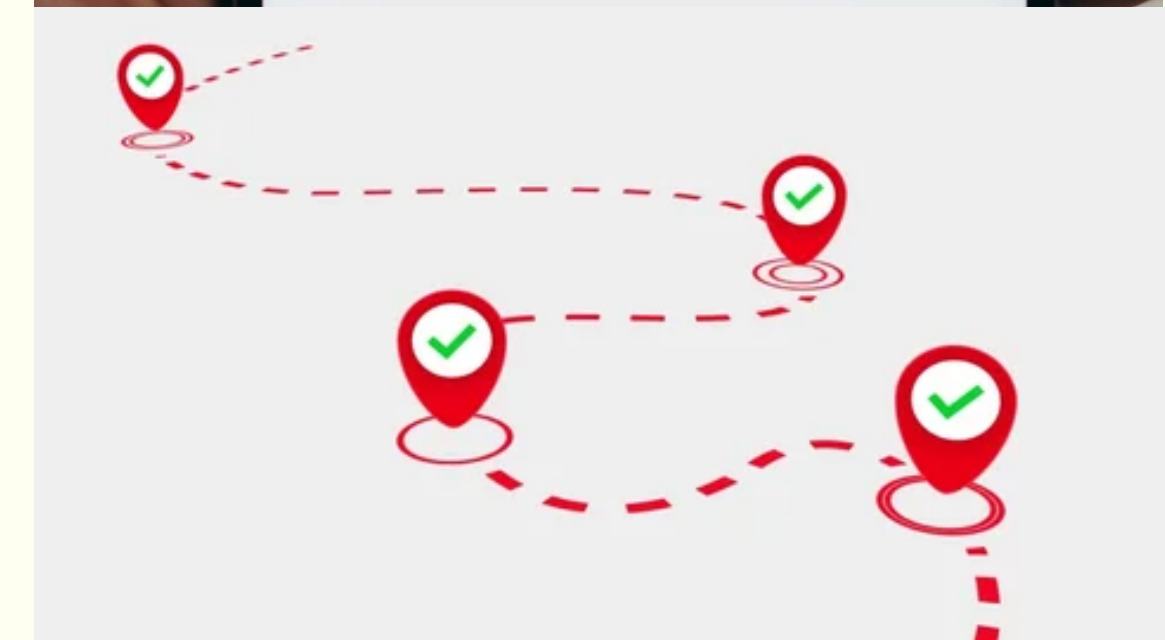

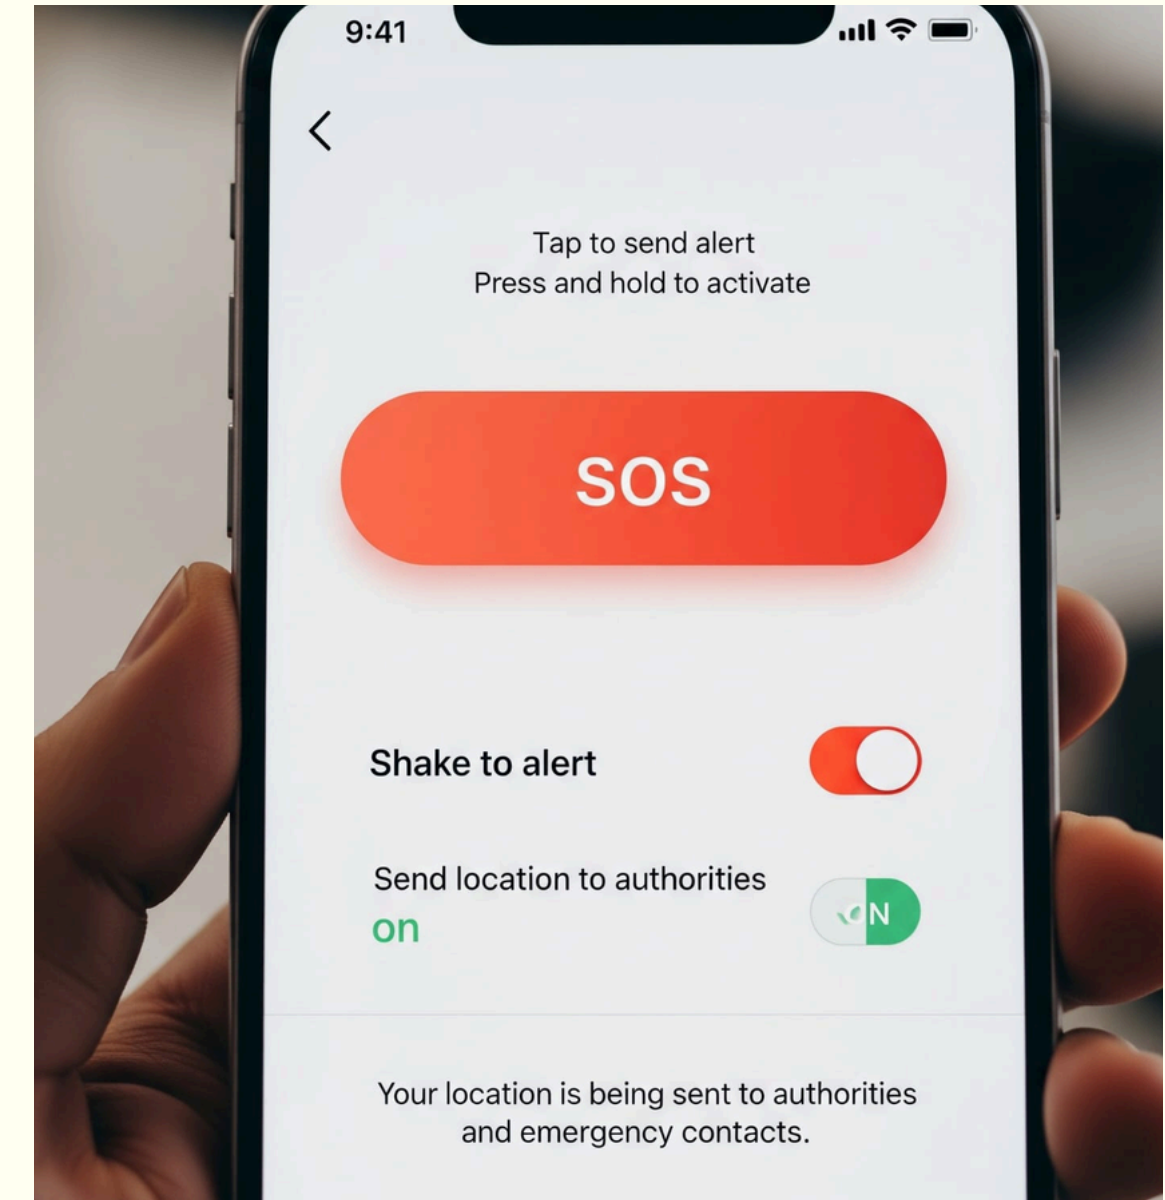

Online surveys, telephonic interviews, and on-field discussions in tourist spots

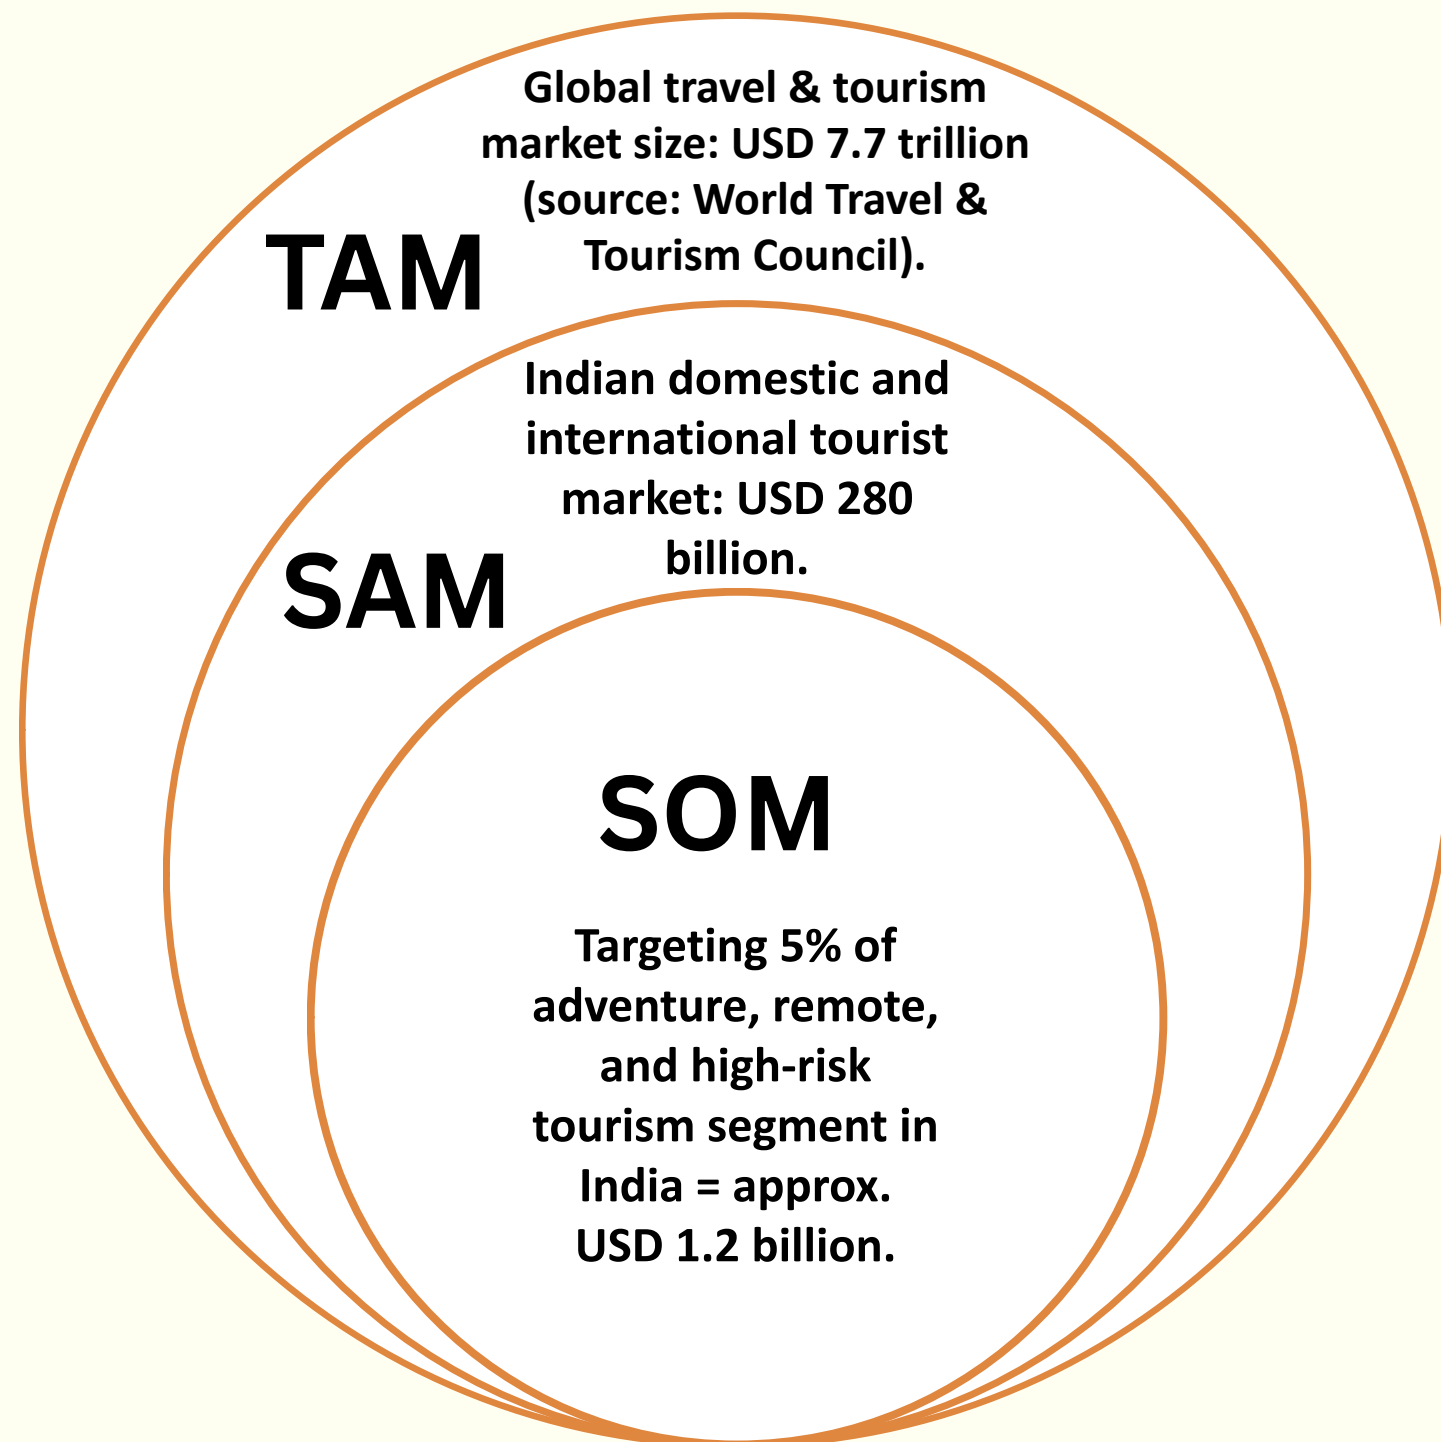

**3.How many of them agree this is a problem and wants a solution?**

80% tourists and 90% tour operators.

**4.How many of them said they don't need a new solution?**

10% tourists felt current SOS apps are enough

## How to calculate market size?

1. Start with Total Addressable market- ...USD 7.7 trillion (Source: World Travel & Tourism Council)....

TAM refers to the total market demand for a product or service.

If you're entering a pre-existing space (like small business banking), you can research it and provide credible sources or reference points on how you arrived at the TAM. If you're creating a new product or space (like Slack), you can estimate the number of customers that would want your product and approximate how much you could charge them.

2. Take your target market (SAM), within that TAM, which varies depending on geography and other logistical factors. Determine the penetration potential of your target market. This is the portion of the market you can reasonably compete with...USD 280 billion...

3. By conducting research with existing competitors, distributors, etc., understand the likely penetration rate.....5%.....

4. Multiply the target market by penetration rate to find your market size...USD 280 billion  $\times$  5% = USD 1.2 billion...

This slide is to provide details on Market Size and demonstrate How big is the market opportunity your venture is pursuing. Add source/reference to the data presented.

# Customer Persona

Personality trait

Personality trait

Personality trait

Photo

Ethos

Age:  
Occupation:  
Location:

Personality

Goals

Frustrations

Bio

Motivations

The aim is to collect the information about your ideal customer persona who are likely to buy your product or service . It will help you tailor the user experience through targeted design.

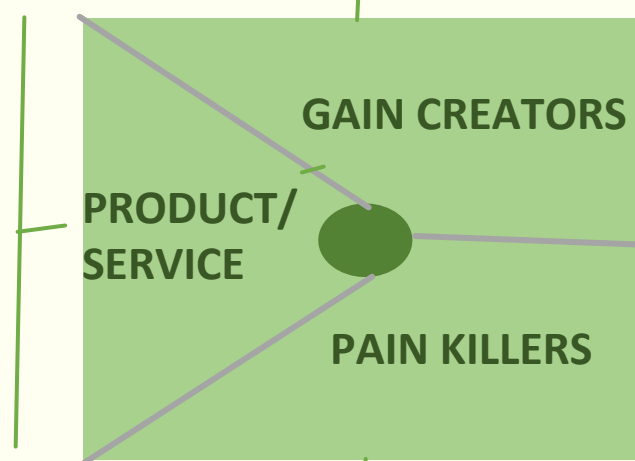

# Value Proposition Canvas

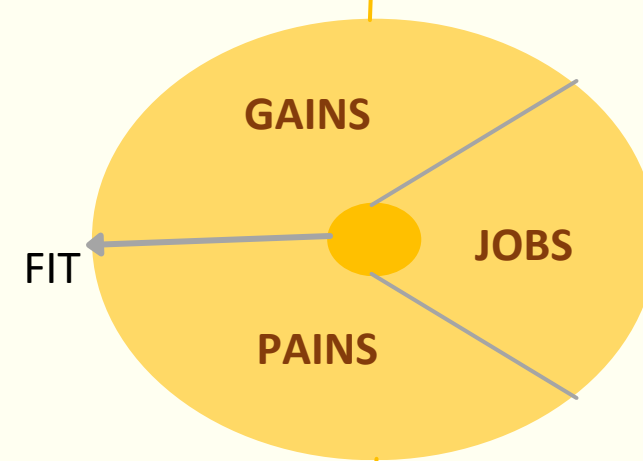

- What do you offer that makes the customers happy?

**What is the product or service that you are offering?**

- Which features of your offering relieve the customer's pains?

FIT

I would **LOVE** it if:

- ? What would make the customer happy?
- ? What do the clients want when facing the problem?

*This refers to the feeling/action of customers before he gets in contact with your solution.*

I would **WANT**:

- What do the clients do (actions) when facing the problem?

*This refers to the feeling/action of customers before he gets in contact with your solution.*

I would **HATE** it if:

- What are the pains of the clients when facing the problem?

*This refers to the feeling/action of customers before he gets in contact with your solution.*

Demonstrate the fit between what you are offering and why people buy it. You must build on solution (products & service) that match their needs ( pains & gains).

**Describe your Solution:**

We offer .....

The details of our offering consist of:

1.....

2.....

3.....

**List the Benefits of Your solutions**

### Business Model (Explain with a process diagram)

This canvas explains how the venture makes money (attracts, serves and keeps customers)

- **Provide Full product/service description**
- **Insert a picture of the prototype**
- **Provide video link of the working prototype, if any**
- **Share screenshots of website ( Landing page, testimony etc.,).** If the venture is in any online business, it must definitely showcase a functional website.
- **Share website link** (If the venture is in any online business, it must definitely showcase a functional website.)
- **Share App link**
- **Description of how the product will work and steps the customer will follow**
- **Any other information**

The slide helps to see your vision in action with a clear demonstration

# MVP Validation

**What is your MVP**

**Test Details:**

**How long will we test this MVP?**

**Who is our target audience for the test? How many of them?**

**How will we get to that audience?**

**Conclusion:**

- ☐ Persevere
- ☐ Pivot
- ☐ Not conclusive

**Results of Test:**

**Did enough customers buy? Why or why not?**

**Did customers pay the price we expected? Why or why not?**

**Did customers come back to our product or show interest in doing so? Why or why not?**

**Did customers recommend our product to others or evangelize about it? Why or why not?**

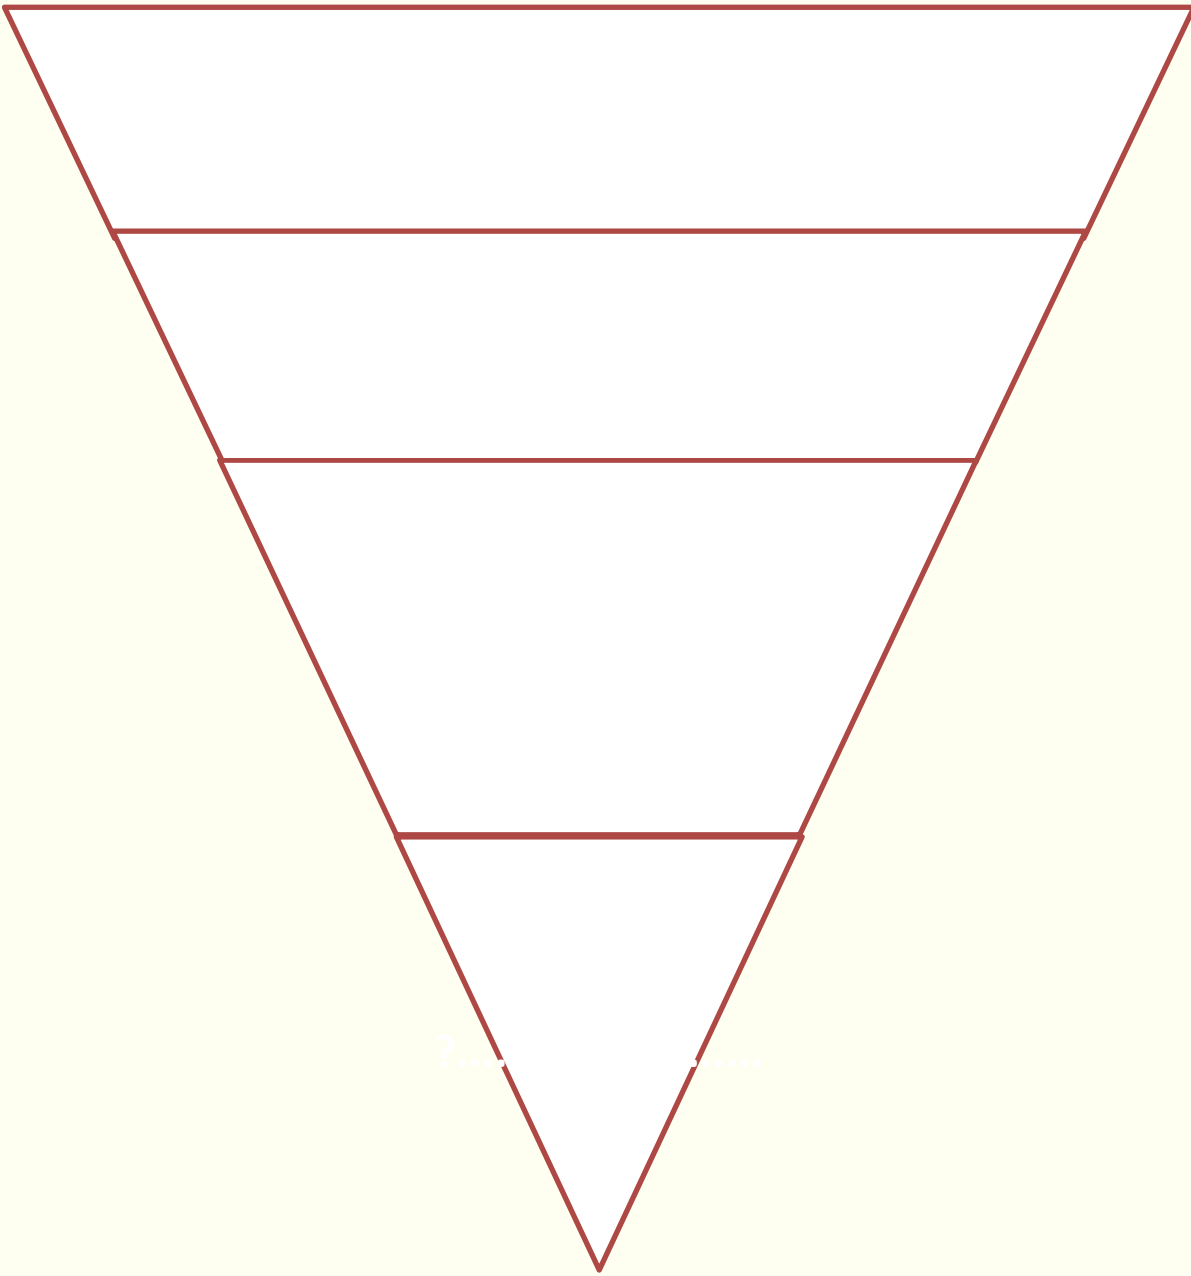

**Realizations / Insights:**

**Next Steps:**

## Customer Sales Funnel

## Customer Acquisition Plan

| 1                              | 2                                | 3                                                          | 4                         | 5                                                         |

# Financial Projections

# Unit Economics

| P & L/ unit         | Year ..... |
|---------------------|------------|
| Revenue             |            |
| COGS                |            |
| Gross Profit        |            |
| Gross Profit Margin |            |
| Operating Costs     |            |
| Operating Profit    |            |

| Unit Economics | Year ..... |
|----------------|------------|
| CAC            |            |
| CLV            |            |
| ARPU           |            |

The above is the Unit Economics for year 1 (year .....). Refer to P&L statement for year 1 in slide 16.

| Terms                            | Explanation (For the actual calculations, refer to the Financial Plan Excel sheet link)                                    |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| CAC                              | (Cost of Sales + Cost of Marketing ) / Number of new customers acquired (in currency terms)                                |
| <a href="#">CLV</a>              | Average purchase value x Average purchase frequency x Average Customer Lifespan x Gross Margin                             |
| ARPU                             | Total revenue in specific period/Total number of customers during the same period (in currency terms)                      |
| GROSS PROFIT                     | Total revenue – Total COGS (In currency terms)                                                                             |
| <a href="#">OPERATING COSTS</a>  | Cost of goods sold (COGS) + operating expenses (OPEX)                                                                      |
| <a href="#">OPERATING PROFIT</a> | Revenue from Core Operations – Cost of Goods Sold – Operating Expenses – Depreciation – Amortization Expenses              |
| CHURN RATE                       | (Customers at the beginning of the period – customers at the end of the period) / customers at the beginning of the period |
